COMPLETE NUTRITION-Wendland nutrition for the lifetime of you dog. When you feed Wendland dog food, you can be sure that you are providing 100% complete and balanced nutrition for all stages of his life. This product has been scientifically formulated and tested to assure that it provides all the nutritional essentials your dog needs, as established by the National Research Council.

Wendland's High Protein Dog Meal is formulated especially for those dogs that have greater protein and energy demands due to their higher levels of activity, such as nursing and hardworking dogs, or dogs exposed to cold weather. High Protein Meal has extra protein to help build and maintain body tissues of these dogs and has more energy-giving carbohydrates and fats to help replace the energy these dogs burn up daily.

FEEDING SUGGESTIONS

ADULT DOGS: Feed High Protein Meal dry or mixed with water, milk, or broth. (If served with Liquid, we suggest one part liquid to four parts High Protein Meal). Your dog should be fed what he will normally eat in a day. The following amounts are recommended for adult dogs with normal activity. However, portions should be slightly higher or lower depending on your dog's daily activity.

DOG SIZE	WEIGHT	DAILY AMOUNT
TOY BREED	Up to 10 lbs.	1 Cup
Small	11 to 30 lbs.	2 Cups
Medium	31 to 60 lbs.	3-4 Cups
Large	61 to 90 lbs.	5-8 Cups
Extra Large	Over 90 lbs.	9-11 Cups
Amt. Based on std. 8 oz. cup		

PUPPIES: Puppies can be started on High Protein Meal as early as they begin to nibble at solid foods (usually 3-4 weeks of age). Until six months of age, pups should be fed all of the moistened High Protein Meal they will consume at intervals throughout the day. If fed dry, High Protein Meal may be kept before the pups at all times.

REMEMBER-PROVIDE YOUR PET WITH FRESH DRINKING WATER IN CLEAN CONTAINERS AT ALL TIMES!
