FEEDING SUGGESTIONS

ADULT DOGS: Wendland's Professional Dog Food can be fed straight from the bag. For variety, moisten with no more than one cup of warm liquid to every four cups of food. The amount of food required by adult dogs will vary according to breed, size, age, temperament, climate and degree of activity. In climates with higher temperatures, intake may be reduced. Hardworking dogs and dogs under stress may require more food. Start with the chart below and vary the amount according to your dog's appetite in order to maintain proper body weight. Most dogs can be fed once daily. When feed intake is high, twice a day feeding is recommended.

WEIGHT OF DOG	CUP* TO FEED
Up to 9 lbs.	1
10 to 18 lbs.	2
19 to 27 lbs.	3
28 to 36 lbs.	4
37 to 45 lbs.	5
46 to 54 lbs.	6
55 to 63 lbs.	7

For dogs 90 lbs. or over, feed approximately one cup* of food per 10 pounds of body weight.

- Amounts are based on a standard 8 ounce dry measuring cup.

PUPPIES: At 3-4 weeks of age, begin feeding pups Wendland's Professional Dog Food softened with warm water. Feed as much as they will consume three times a day until six months old, then twice a day until nine months old. When fed dry, Wendland's Professional may be kept before the pups at all times.

PREGNANT AND LACTATING DOGS: During pregnancy, feed the female twice each day, adjusting the amount to provide weight gain without becoming overweight. After whelping, the nursing female will need 2-3 times her normal food intake to maintain body condition.

REMEMBER-PROVIDE YOUR PET WITH FRESH DRINKING WATER IN CLEAN CONTAINERS AT ALL TIMES!
