

Sunglo 400 Series

The 400 Series is used in pigs weighing 40 pounds to 100 pounds.

The 400 Series has guarantees of 18% Protein, 1.3% Lysine and 5.5% Fat.

It is cost effective for use after the 800 Series to maintain bloom and maintain a high percent saleable pig. It's also an effective receiver feed due to its palatability and combination of medications. S-403 contains CTC/Denagard for a broad spectrum control.
