

Sunglo Definition

Sunglo Definition is a water-soluble product containing a complex formula that has been researched by Akey to enhance appearance and definition of muscle as animals enter the show or sale ring. Use 5 ounces per 250 pounds of body weight 5 hours and again 2 hours before entering the ring. Each dose may be top dressed on feed, (if water intake is normal) or dissolved in water. Sunglo Definition is available in a plastic tub containing 10-5 ounce packets.
