GUARANTEED QUALITY

Pure. Safe. Effective. Easy to use.

Spectra & Focus vaccines are made to exacting quality standards and temperature controlled from plant to you.

Peak protection against major infectious diseases.

USDA approved for purity, potency, safety and efficacy.

Indications

This product has been shown to be effective for the vaccination of healthy dogs 8 weeks of age or older against *Bordetella bronchiseptica* (*B. bronch*), canine parainfluenza (CPIV), and canine adenovirus type 2 (CAV2). The duration of immunity has not been determined. For more information regarding efficacy and safety data go to productdata.aphis.usda.gov.

Directions and Dosage

Open the syringe by twisting or tapping the cap against a hard surface to break the heat weld. Aseptically rehydrate the vaccine cake with 1 mL of sterile diluent supplied. Shake until dissolved. Withdraw entire contents into the syringe. Twist and remove needle from syringe and attach enclosed applicator tip. Using the syringe with the applicator tip attached, administer 0.5 mL of rehydrated vaccine into each nostril. Historically, annual revaccination with this product has been recommended. The need for this booster has not been established. For advice on revaccination frequency and annual booster vaccinations, consultation with a veterinarian is recommended.

Precautions

FOR INTRANASAL USE IN DOGS ONLY. This vaccine is NOT to be injected. Store in the dark at at 35°– 46°F (2°– 8°C). DO NOT FREEZE. Do not mix with other products, except as specified on this label. A very small percentage of dogs may show sneezing, coughing, or nasal discharge following vaccination. While these are usually temporary signs, consultation with a veterinarian may be indicated if they persist or progressively worsen. In case of anaphylactoid reaction, administer epinephrine. This product has not been tested in pregnant animals. In case of human exposure, contact a physician. Inactivate unused contents before disposal.
